[PROP-Draft-Davis Comments-09092016-v1.docx](#)

Here's what I have so far between the rest of everything going on today. Two quick notes:

1) Though it's a Report of the Parties, I really like how you are crediting and recognizing other players. I've tried to add similar references into a few other places knowing that implementation of the GLWQA relies heavily on them.

2) I haven't reviewed for mechanics but where I've found passive voice, etc., I've identified.

The other changes are for accuracy or speak for themselves.

Will get other comments to you but at least this should get you started.

Since you are typing either way, might as well type directly into this document. (It's the same document you have, but I accepted all the previous track changes, so that your edits will stand out against the "clean" text.) Thanks!

So far not many suggestions. If you want me to provide to you in edit function, please send me the e-doc. Otherwise will just type into email if you want to avoid version confusion.
